EVALUATION

1) Poor
2) Fair
3) Satisfactory
4) Good
5) Very good
6) Excellent

I was able to get feedback about my website from some of my friends, of which some of them are taking Applied ICT who would give me technical feedback while my other friends would judge from the appearance/presentation of my work.

Judging my own performance, I would say that I am capable of achieving higher standards of work, my major problem was working against time. More and frequent flash media could have made my work better. Many more images should have been added to reduce the dullness of the work.

	Chand Ashani	Elijah Karanja	Dheer Vora	Faith Maina
General appearance of web design	5	4	5	6
Amount of research done	3	3	4	4
Good use of language	4	4	5	3

Ease of access	4	3	4	5
Technicality of code	4	5	5	4

Final remarks

Chand: pretty good general layout, more flash images would have been better.

Elijah: extra effort could have been put in the design of the webpage and more animations and statistical videos could have been used to give a better perspective

Dheer: good job on the webpage, better dropdown lists should have been used and more statistics would have been good.

Faith: really cool background picture, even though some of the font was masked by the background, it is a really nice webpage.
